How are you doing?
It has been a while since we have had contact. I hope your business is good.
I reach out to you to tell you about the tremendous step Cosesy has taken to improve **business opportunities** for our alarm distributors.

Many of our customers have started realizing, that selling good hardware does not bring them the whole way.
Now you can monitor alarm systems in your community from your own **alarm central**.
You may offer the system with **free service** or with a **recurring subscription**. We support you creating a close relationship to your customers - year after year.

Feature that helps you boost the business:

1. Aftersales through the app.

Your web shop in the palm of the customer.

The app is the daily interface to the alarm system. Cosesy give you the opportunity to sell your products in the app and thereby gain more aftersales.
Run news and sales campaigns in the app and reach your customers instantly.

2. Boost your income.

Sell security services through the App.

By a click in the app, the customer enables one or more professional security services. Professional security services are functions, subject to payment, that improves the security.
Example: Pictures, taken automatically by his security camera, are stored in his private and secure vault in the Cloud.

3. Central monitoring and support.

Keep track of your customers.

Cosesy ALMA™ is a central monitoring and support software. You may use ALMA™ to monitor and support your customers - or you can even offer Alma™ to communities and let them do their own monitoring.

4. Open hardware.

Pick the hardware you like.

The Stealth4™ hub is developed in Europe specifically for Cosesy Cloud™. We share the technology with you and thereby create the best platform for future improvement of your business.
The Stealth4™ hub comes as complete sales ready product or as a blueprint-

Alma™ central monitoring with end-users App

Stealth4™ hub designed for Cosesy Cloud™

package ready to give to your own vendor or manufacturer.

However, we also welcome your own selection of hardware (e.g. from China) for integration in the Cloud.

5. Get started…Easy entry.
No big investment

Central monitoring from just 25 alarm systems in a community.

See the attached **.pdf file** with more information. If you have questions to our products, please do not hesitate to contact me.

We hope to welcome you at our boot on the security exhibitions in Essen, Germany and Beijing.
If you don't have time to visit the exhibitions, please contact us for a remote demonstration.
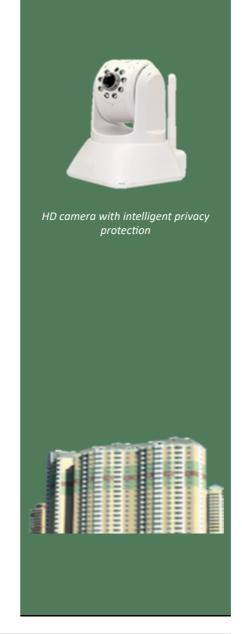

Thank you

Kind regards

Henrik Hvid

HD camera with intelligent privacy protection

Cosesy Cloud™ uses latest internet technology in a 360° business solution for manufacturers, distributors and security companies, who want to drive more revenue out of the security industry.
We connect wireless security detectors to alarm receiving stations and private people's smartphone.
Cosesy Cloud™ is designed with attention to secure living communities, high-rise buildings and shopping malls .
Detectors communicate in real-time. The residents use their smartphone for daily operation and setup.
Security staff monitors the home from the alarm-receiving-station.
